

About PlacementConnect • New Delhi / National Capital Region (NCR), India

Building a More Verifiable Campus Placement System

PlacementConnect connects colleges, graduating students, and corporate employers through structured placement operations, readiness assessment, and verified hiring workflows. We are building the operating infrastructure colleges use to manage graduating cohorts, give students clearer pathways to corporate interviews, and help hiring teams evaluate fresher talent on verified readiness rather than resumes alone.

🔗 WHY WE EXIST

Why We Built PlacementConnect

Across hundreds of engineering, management, and degree institutions in India, campus placement still depends heavily on spreadsheets, scattered WhatsApp groups, unverified PDF resumes, and inconsistent outcome records.

- ✔ **Colleges & TPOs** spend months manually reconciling student eligibility lists, drive attendance, and placement denominators.
- ✔ **Graduating students** outside a handful of tier-1 campuses struggle to access structured corporate interviews even when they have strong fundamentals.
- ✔ **Corporate hiring teams** receive thousands of nearly identical fresher resumes with no trustworthy baseline of analytical, technical, or workplace readiness.

✔ OUR MISSION

What PlacementConnect Is Working Toward

Make graduate hiring in India more structured, verifiable, and accessible—by giving colleges better placement infrastructure, students clearer pathways to interviews, and employers better evidence of candidate readiness.

For Higher Education Institutions:

Replace ad-hoc spreadsheets with a structured placement workspace and clear, four-stage cohort reporting designed to support internal governance and NAAC/NIRF documentation workflows.

For Graduating Cohorts:

Provide a credible 9-area employability evaluation, a verifiable readiness scorecard, and a tracked commitment of 3 corporate interview opportunities.

We founded PlacementConnect to give all three sides of campus hiring a single, shared system built on verified institutional data and structured readiness evaluation.

For Graduate Hiring Teams:

Deliver pre-assessed, institution-verified shortlists so recruiters spend time interviewing qualified candidates rather than filtering raw resumes.

 HOW THE ECOSYSTEM WORKS TOGETHER

One Network. Three Participants.

PlacementConnect is not an open job board where anyone can upload an unverified resume. The platform works because each participant contributes a specific layer of verification that makes the ecosystem valuable for the other two:

1. Partner Institutions

Colleges, Universities & TPOs

What they bring:

Verified graduating student rosters, official academic records (CGPA, branch, active backlog status), and campus drive governance.

What they receive:

A dedicated placement workspace to manage student readiness, coordinate employer interviews, and generate structured four-stage cohort reports.

2. Graduating Students

Final-Year Campus Cohorts

What they bring:

Completion of the standardized 9-Area Job-Readiness Assessment and verified institutional enrollment credentials.

What they receive:

A shareable digital readiness scorecard (with a unique verification ID) and 3 tracked corporate interview opportunities within 12 months of assessment completion.

3. Corporate Employers

Talent Acquisition & Hiring Teams

What they bring:

Defined fresher role criteria, degree and skill thresholds, and structured first-round corporate interview slots.

What they receive:

Institution-verified, pre-assessed candidate shortlists and coordinated single-college or multi-campus interview workflows.

 OPERATING PHILOSOPHY

Principles We Operate By

Every product decision, college partnership, and student commitment at PlacementConnect is governed by four operational rules:

Principle 01

Verification Before Matching

Principle 02

Readiness Before Interview

Every student profile in our network is anchored to a participating college’s verified Campus Code and official batch roster before it is ever presented to an employer.

Students complete our 9–Area Job–Readiness Assessment first so hiring teams can evaluate demonstrated analytical, technical, and workplace readiness alongside academic grades.

Principle 03 **Capacity Before Cohort Expansion**

We do not expand student intake without sufficient confirmed employer interview capacity in our hiring pipeline (maintaining at least a 1.20× capacity reserve) so we can honor every 3-interview commitment.

Principle 04 **Evidence Before Outcome Claims**

We never publish ambiguous or inflated single-number placement claims. Cohort progress is reported across four explicit stages, and every student scorecard can be verified online via its Credential ID.

 COMPANY & LEADERSHIP

Who Is Building PlacementConnect

Ashwani Kumar

Founder & Product Lead

Leading institutional partnerships, product architecture, and assessment governance at PlacementConnect Institutional Systems (India Operations Desk) (New Delhi / National Capital Region (NCR), India).

PlacementConnect is built by an India-based product and institutional operations team working directly with Training & Placement Officers, college Principals, and corporate Talent Acquisition teams. Rather than operating as an anonymous job portal, every institutional MoU, student cohort onboarding, and employer hiring drive is directly managed and supported by our operations desk in New Delhi / NCR.

Direct Accountability: Institutions and employers sign formal partnership agreements with **PlacementConnect Institutional Systems (India Operations Desk)** with named relationship support and SLA-backed operational channels.

 OUR CURRENT STAGE

Where We Are Today

We are currently building our founding institutional and employer network in India, working directly with engineering, management, and degree colleges and corporate graduate hiring teams.

✔ **Live Institutional & Assessment Platform:** Our TPO cohort workspace, 9-area student assessment engine, and public credential verification registry ([/verify](#)) are live and operational.

✔ **Founding Partner Onboarding:** We are onboarding partner colleges (under our 1-Year Annual and 5-Year Multi-Cohort MoU options) alongside corporate fresher hiring teams across software, analytics, business, and operations roles.

✔ **Transparent Public Previews:** Public previews on this website use clearly labeled illustrative sample records (such as Apex Institute of Technology and Aarav Sharma — STU-2026-000001) so prospective institutions, students, and recruiters can inspect our exact scorecards and workflows.
